

Carbon Reduction Plan

Supplier name: Canary Care Global Limited part of Luxion Group Limited

Publication date: 15th October 2026

Commitment to achieving net zero

Luxion Group, including Canary Care Global Limited, is committed to achieving net zero emissions by 2050.

This commitment consists of a commitment for Scope 1, Scope 2 and operationally controlled Scope 3 emissions to be net zero by 2030 and for all other emissions sources to be net zero by 2050.

This commitment is supported and adopted by Canary Care Global Limited and applies to it in full.

Baseline emissions footprint

Baseline emissions are a record of greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022	
Additional Details relating to the Baseline Emissions calculations	
Emissions cover Luxion Group's UK operations, including Canary Care Global Limited, and are calculated in line with the GHG Protocol Corporate Standard using the UK Government conversion factors, Scope 2 emissions are reported on a location-based basis.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	1,102.75
Scope 2	228.71
Scope 3 (included sources)	
Upstream transportation and distribution	581.07
Waste generated in operations	3.62
Business travel	609.81
Employee commuting	225.76
Downstream transportation and distribution	99,320.30
Total Emissions	102,072.02

Current emissions reporting

Baseline Year: 2025	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	1,370.69
Scope 2	212.96
Scope 3 (included sources)	
Upstream transportation and distribution	0
Waste generated in operations	0.996
Business travel	414.66
Employee commuting	244.61
Downstream transportation and distribution	27,390.30
Total Emissions	29,634.22

Emissions reduction targets

In order to continue our progress to achieving net zero, we have adopted the following carbon reduction targets, which apply to Canary Care Global Limited:

- **Operational emissions:** The Group's primary target is to achieve net zero operational emissions by 2030 across Scope 1, Scope 2 and operationally controlled Scope 3 emissions, measured against a 2022 baseline. Of the emissions reported in this plan, this covers Scope 1, Scope 2 and the Scope 3 categories upstream transportation and distribution, waste generated in operations, business travel and employee commuting. These totalled 2,751.72 tCO₂e in 2022 and 2,243.92 tCO₂e in 2025.
- **All other emissions:** downstream transportation and distribution emissions are covered by the Group's commitment to achieve net zero emissions by 2050.

We project that our operational emissions will decrease from 2,751.72 tCO₂e in 2022 to net zero by 2030, in line with our operational target.

Carbon reduction projects

Completed carbon reduction initiatives

Between 2022 and 2025, total emissions reported in this plan reduced by 72,437.80 tCO₂e , a reduction of 70.97% against the 2022 baseline. The following environmental management measures and projects are amongst those completed or implemented across the Group since the 2022 baseline. The measures listed apply to Canary Care Global Limited and will be in effect when performing the contract.

- Introduced new policies to support lower-carbon business travel
- Improved the Energy Performance Certificate rating at Hutwood Court Head Office from D to B
- Improved the Energy Performance Certificate rating at the Winchester warehouse from D to B
- 30% of the Group's leased fleet is now electrified

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

- Publishing a formal transition plan in the 2027/28 financial year, setting out how carbon reduction will be achieved across our sites, fleet, people and supply chain.

Declaration and sign off

This Carbon Reduction Plan has been produced in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate government emissions conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard. All reported emissions have been externally validated against ISO14064.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body)

Signed on behalf of the supplier:
